Career Horizon Services, a program of Spanish Peaks Healthcare Systems, is a local non-profit offering a full array of pre and post-employment services, including a nationally certified work readiness program. We can assist employers in streamlining their hiring process by identifying a pre-qualified, work-ready pool of job applicants. We also provide services in the workplace to improve, refine, or redefine beneficial work skills and behaviors. These services are provided one-on-one ~ job coaching, departmentally ~ education and training, or system-wide ~ company culture strategic planning.

If you are an employer who hires entry level employees, Career Horizon Services also offers the National Work Readiness Credential program. This is a forty hour intensive face-to-face program that offers a valuable opportunity for employers who need assistance in retaining and training accountable employees. The course provides practical and immediate application of job skills needed for nearly every job. The program helps employees develop and practice skills in active listening, situational judgment, conflict management, reading comprehension, basic math, and employer expectations. The forty hour course and credentialing assessment costs \$300.00 per participant. This tuition includes the official three hour assessment and workbooks. We are available to arrange classes for your employees with class sizes ranging from ten to twenty participants.

As part of this program, we also offer pre-employment screening for employers who wish to send new or potential hires for the credentialing assessment to gauge their work readiness. The assessment-only fee is \$90.00 per individual.

For more information, please contact our office at 719-423-1800.
